## About Yellow

Yellow's goal is to build an enduring business that makes life better for our customers and creates great lives for our team. We provide solar-power electricity solutions and financed smartphones which makes these life changing products affordable to bottom of the pyramid households and individuals.

Our story is simple - we want our customers to enjoy a better life with energy in their home with a financed solar system, internet all the time with a financed smartphone and afford them opportunities through an ecosystem of digital and financial services.

## BUT NOW...

We have launched a new business model and we need incredible team members to exponentially GROW and impact 10 million customers by 2030!

### What are we doing?

We want to become the largest rural asset financing and financial services companies in Africa. We form partnerships with our solar home system agents and smartphone merchants based on value and trust. Our model is simple: we make essential items (like solar home systems and smartphones) that allow access to electricity, light, communication and the internet, affordable and accessible, to people who otherwise have not had the opportunity to access these technologies. These are life changing technologies for many of these customers.

## **What will you be doing?**

You will be working with a young, nimble and small finance team. We look after the accounts for the businesses in: Malawi, Rwanda, Uganda, Zambia, Madagascar, South Africa and Mauritius.

Making payments across different countries and platforms.

Reconciliations.

Audits.

Tax (income tax, VAT, withholding tax, duties and more!)

Keeping records. Governance. Controls. And more!

Making sure there is enough money where it needs to be when it is needed!

Budgets. Forecasts. Modelling.

## **Skills Required**

- Self-starter & proactive
